The National Press Company

of New York

Makes more and better advertising plates than any other concern in the world. Furthermore, all orders, big and little, are out on time. This may seem marvelous, but it is true.

Perfect Patterns Insure Perfect Ads

To make superior plates requires superior patterns.

If you find difficulty in securing first-class patterns, the National Press Company will design and make them for you. You will please take notice, however, that while the National Press Company makes plates cheaper than anybody else, the National Press Company does not make cheap patterns. In fact, the National Press Company charges huge money for that kind of work—but the work done by the National Press Company is worth more than the National Press Company charges for it.
