to embrace falt fprings and licks. He knew there were other ores in that territory and had feen fpecimens of a very rich copper ore when he had gone into that country.

Dr. Mitchill faid that the executive had anticipated the gentleman's object, and he expected the Houfe would be foon gratified with an account of the difcoveries now making by major Lewis and other agents on the Miffouri, Arkanfas, Red river, &c. as they refpect the mineral, vegetable and animal kingdoms, on which account he preferred the refolution in its prefent ftate.

The refolution was carried without oppofition, and adopted by the Houfe after the rifing of the committee, and ordered to be engroffed for a third reading to-morrow.

The committee appointed for the purpofe, reported a bill declaring the affent of Congrefs to the act of North Carolina authorifing the ftate of Tenneffee, to perfect the title to land referved by the ceffion act, the fame was read a fecond time, and referred to a committee of the whole for to-morrow.

Mr. *M. Clay*, reported a bill authorifing the Marine Infurance Company of Alexandria to infure againft lofs by fire—it was alfo read a fecond time, and referred to a committee of the whole for to-morrow.

Being informed, that the captains of American veffels, that arrive in the different ports of our empire, make a practice of felling their cargoes, wholefale or retail, to fmall dealers.

Confidering that the above practice is prejudicial to commerce, and favors the exportation of all the fpecie from the ifland, we determine to put a ftop to it.

The merchants eftablifhed by virtue of our Letters Patent, fhall have the fole power to treat for the cargoes, either feparately or jointly

LIBERTY OR DEATH.

Jacques the 1st, Emperor of Hayti.

Taking into view the protection and good will, that we fhow to foreigners, who tranfact commercial concerns with us; and who, inftead of occupying themfeles with their commerce, and refpecting the laws of the country with which they deal, are purfuing the moft extraordinary conduct, in facilitating the efcape of men and women of colour, natives of the country.

PHILADELPHIA, November 13.

Information—The lead mine difcovered on Perkiomen creek, the property of Francis Dacofta, has been lately opened, and attended with great fuccefs. The vein proves to be a regular one, and of a long continuance. It courfe is NNX. its direction nearly perpendicular, and its thicknefs from one foot to 15 inches.

Two tons of that beautiful ore was raifed in a few hours, and one ton more at leaft was left in the bottom of the pit, which is yet but 9 feet deep. From the fituation of this mine, its nearnefs to navigation and market, its very commanding height, its richnefs in metal, and the large fcale it forms on, it is thought by judges to be one of the firft difcoveries yet made in the United States.

From the analyfis made of 100 parts, it contains—

Oxyd of lead	85
Oxyd of iron	1
Sulphuric acid	13
Water	1
	—100

The lead being coupelled, has proved to contain 2 1-3 oz. fine filver to 100, which is nearly 3 dollars worth of that metal.

11 OCTOBER, 1804.

Having feen, Mr. Editor, in your Moniteur, No. 448, that the Prefident of the United States includes me in the nomination of the members of the legiflative council of this province, I requeft you to infert in your next number, my reafons for not conforming to his arrangements; you will find them in the fubjoined. I am your humble fervant,

BORE.

11 *October*, 1804.

I am very fenfible of the high honor of being included in the number of thofe whom the Prefident of the United States has nominated to compofe the legiflative council of the territory of Orleans; notwithftanding all the refpect I owe the Prefident, I think it my duty, as a citizen, to decline it, entreating him to accept the apology of an individual who claims all the rights of Louifianians, which are reprefented in their memorial to Congrefs, and from which we expect a favorable refult.

The remainder of my advanced life is devoted to my country; it is at the difpofition of my fellow citizens, if they value my fervices, whenever we fhall be eftablifhed in all our privileges.

Thefe are my immutable fentiments.

A BALLOON ADRIFT.

Biot, member of the National Inftitute, intended, laft Wednefday, in company with a friend, to afcend from the obfervatory in the air, and to make their meteorological and phyfical experiments. Government fent him, upon this occafion, its largeft balloon, the fame that had been in Eygpt. But no fooner was this balloon filled, than a fudden guft of wind carried it away, and it has hitherto not been heard of or found. According to calculation, if it meets with no accident it may arrive at or approach fome of the planets neareft to our globe; and as all our beft mathematical, aftronomical, phyfical and meteorological inftruments were embarked, with feveral bottles of wines and liquors, fhould it arrive any where in univerfal fpace where the inhabitants have not reached the fame ftate of civilization as upon our planet, it may produce information, which chance has fo often produced in our arts and fciences. It is well known that it is to chance alone we are indebted for our greateft difcoveries.

THEATRE.

The citizens of Wafhington and George Town, were they apprifed of the ingenuity and fplendid mechanifm which is difplayed by Mr. Maginnis, would not withhold their petronage from his efforts to pleafe—And they may reft affured, notwithftanding the remarks which have fallen from fome of the fpectators, the exhibition of the *Fantoccina* is worthy the obfervation of the curious and enlightened.—The proprietor on the firft night's exhibition had to labor through an ocean of difficulties—through the hafty means of fitting up the ftage, a proper exactnefs was not to be expected—thofe difficulties were fubdued, and the performance laft night, to an audience, though thin was very refpectable, afforded much fatisfaction and delight—The theatre is now rendered comfortable by the fixture of ftoves in various parts, and the exertions of an individual to render the performance fatisfactory, are very great on the part of Mr. Maginnis.—From the dearth of amufements in this place, much credit ought to attach to one who by his endeavours ftrives to beguile the tedious hours.

CANDOR.

WILLIAM PINKNEY, *Esquire.*—In an obfcure corner of a daily print, fmothered amidft the abreviations of fhip-news, and no where elfe to our knowledge, the arrival of this gentleman has been announced to the public. Mr. Pinckney has arrived at Baltimore, & brings with him the pleafing news of the actual transfer of our Bank Stock in England, fo long claimed by this ftate. To Mr. Pinkney, we are credibly advifed, the ftate is much indebted for the recovery of her Stock, and the legiflature will doubtlefs make him a handfome compenfation for his zeal, abilities, and perfeverance exercifed in procuring the transfer.

Judge Chafe (it is, perhaps, not generally known) is entitled by law to 4 per cent. commiffion on the fum recevered for his exertions in behalf of the ftate on a former occafion. The neat fum accruing to Maryland, after deducting Mr. Chafe's commiffion, will amount to about 250,000 pounds current money.—REPUB. ADV.

The prefent feffion of the General Affembly of Maryland will, in all probability, be an important one. The principal fubjects of legiflation will, perhaps, be the difpofal of the Bank ftock recovered in England; turnpike roads; chartering the Union and Farmers' Banks; the encouragement of literature throughout the ftate; the abolition of the general court; together with other matters of equal importance. If, upon any of thefe fubjects, it is the wifh of any of the people in our part of the ftate to exprefs their opinions through the medium of the prefs, the ADVOCATE is at their fervice.—REPUB. ADV.
