

# THE RELIGIOUS TELESCOPE

The weekly organ of the United Brethren Church. Its constituency represents the cultured and well-to-do membership of that growing denomination. As an advertising medium it has a field particularly its own. Being a denominational paper of high character, favorably affects the advertiser and his advertisement. Leading advertisers use its columns regularly. Its circulation is largely in Pennsylvania, Ohio, Indiana, Illinois, Iowa and Kansas, while Western New York, Michigan, Virginia and West Virginia, and the Western States are fairly represented. The fact that the advertising columns are under the most careful supervision, nothing being admitted concerning the character of which there is any reasonable doubt, assures an advertiser that he is in most excellent company, and that his money is invested where reasonable returns may be anticipated. Circulation, 18,150. Rate, 15 cents per agate line. Liberal time and space discounts.
