Modes and Fabrics

Has obtained that position in the estimation of the wide-awake advertiser that very few magazines in the country can boast of. To be sure we can only accept 14 pages of advertising. It will not pay us to take more, as it will cost us as much for the paper and printing as we obtain for the advertisements, at the price we are selling space at.

Modes and Fabrics

In its make-up, literary and fashion matter, will compare favorably with any magazine published in the country. It reaches the active buyer—the woman who does the buying for the house. We have refused business every issue, excepting November, for the last four months. If you have an article that appeals to the woman, why, give this magazine a trial; if your article appeals to the man, give it the go by. We do not care for your money so much as your good opinion, and we will wager a page for a year in this magazine that there is no journal in the country with like circulation will bring any better returns than **Modes and Fabrics**. Now investigate and send for a sample copy. Circulation guaranteed, 300,000.
