NEW BOOK FOR SINGING SCHOOLS.

The Crystal—A new singing book, by F. H. Pease, containing Glees, Quartettes, Choruses, Chants, Hymn Tunes, Anthems, &c.; also, a complete elementary department. The Crystal is especially valuable to the Singing School, Day School, to teachers and to the home circle; to the Singing School because it contains copious exercises, examples and explanations, thus saving the time and trouble of writing on the black board; also, contains the major, minor and chromatic scales, treated in a full and comprehensive manner. It is well known to the experienced that Glees and Part Songs are much better for classes than Church music. This work contains the simplest glees, adapted to the wants of beginners, and also music of a more difficult character for those more advanced. It is just the book for the Day School, because it contains, in addition to the lighter music, many new and admirable Hymn Tunes and Anthems, which can be used at morning devotional exercises. It will be of great service to teachers, because it contains the rudiments of music, or the science of musical notation. This part of the work is especially interesting, everything being arranged in a logical, simple and yet complete manner, even trespassing somewhat on the subject of harmony. It will be sought for in the Home Circle and the Concert Room, because it is not simply a "new collection of music," but a "collection of new music," and because the words are of a high order, expressing refined sentiments, many of them being written by our best poets.

The Crystal has one other excellence which no musician can fail to notice, viz: *The Harmonic treatment.* We can confidently say that the Harmony is not only *correct,* (which is more than can be said of two-thirds of the music now being issued) but that it is *strong,* avoiding the mere common-place, not *pedantic,* but instructive and beautiful, and evinces, at every step, the careful study of the author. As in literature, the books which a man reads will have an unmistakable influence upon his character, his conversation and his thoughts, so in music, the harmonic treatment will have a remarkable, perhaps undefinable, but nevertheless decided effect upon the singer. In this respect therefore, we feel that The Crystal will be a teacher in itself.

The author, Mr. F. M. Pease, is well known as one of the most successful teachers in the West. His former works, the "Musical Lyra" and "Western Bell," have had a large sale, and "The Crystal" will certainly become a great favorite. 192 pages printed from new, clear type, and substantially bound. Price, $1.50, or $13.50 per dozen.

Music can be sent safely to any part of the country by mail. We are daily sending hundreds of packages in this way. Any of the above will be mailed post-paid, to any address, on receipt of the marked price. Our large, complete catalogue of music and music Books, will be sent free on application.
