## Scope and Content Note

The papers of John Noel Deisch (1892-1978) span the years 1910-1937 and consist of a typescript with holographic notes and corrections of Deisch's monograph, *The Navigation of Interplanetary Space: A Study of the Question (Problem) of Flights to Other Worlds*, articles by Deisch, correspondence, biographical material, and miscellaneous material relating to Deisch's patents and awards. The focus is on the typescript of *Navigation of Interplanetary Space*, an early scientific treatise in English on space travel. Although Deisch received some training in biology, chemistry, and mechanical engineering and worked for most of his life as a patent draftsman, he seems to have been essentially self taught in the field of astronautics.
