Shopping need not exhaust you!

You can do much to remove the strain that now wears you out.

Don't pound away your energy with every step you take on hardwood floors and concrete pavements. It is just as foolish for you not to provide for this strain as it would be for you to run an automobile without rubber tires or shock absorbers.

You can't go barefoot nowadays, but you no longer have to substitute hard, nail-studded leather in place of the soft cushions with which Nature protected your heel.

You can wear soft, springy heels of new, live rubber. You can let them ab-

sorb the jolts and jars that are now sapping your strength.

Thousands of New York women now wear O'Sullivan's Heels of New, Live Rubber, and come home from shopping with the light, brisk step of youth.

Be sure you get O'Sullivan's and avoid the disappointment of a substitute. Any shoe dealer will put them on; black, white or tan; for men, women or children; 50 cents attached. Most good shoe dealers now sell latest styles already O'Sullivanized.

Don't fuss with two pairs of glasses

Do you have to bother with two pairs of glasses—one for near, the other for far vision? Or are you compelled to peer over the top of your reading glasses, or remove them entirely, when looking at distant objects? **KRYPTOK** (pronounced Crip-tok) Glasses end these eyeglass inconveniences. They restore the eyesight of your youth—enable you to see both near and far objects with equal clearness and distinctness.

KRYPTOK GLASSES
THE ONLY INVISIBLE BIFOCAL

KRYPTOKS keep you young-looking because they have no disfiguring line to reveal the fact that you wear double-vision glasses. The smooth, clear surface is entirely free from the seam and blur of old-fashioned bifocals. Yet the lower part gives you perfect vision for near objects and the upper part perfect vision for far objects.

Write for Booklet, "Eyesight Efficiency." It contains valuable information for men and women who need double-vision glasses. Please give name of your oculist, optometrist or optician, if possible.
