How Fast Does Your Ice Melt?

This determines the first cost, determines the real expense of your refrigerator.

There are two definite reasons to account for the fact that the

BOHN SYPHON REFRIGERATOR

holds ice consumption to the minimum. The Siphon System of rapidly circulating pure, cold, dry air, and an insulation that provides the highest standard of heat resistance ever attained, combine to hold the temperature in a Bohn Refrigerator at 40°. Ice melts very slowly at this low temperature.

The walls of this Refrigerator have, in addition to the outer and inner cases and Porcelain Enamel lining, 7 heat-resisting layers, including two of "Platinum," the exclusive Bohn Insulating material, the most effective lining ever put into a refrigerator.

The Bohn Siphon is installed in practically every dining and refrigerator car in use today. The car builders know.

Call and see our large line, in both wood and white porcelain casings. Some of the best styles, including the one illustrated above, are now marked at attractive prices. We can sell you from \$15 up. If you cannot call, write for our handsome catalog. We are the manufacturers, not middlemen.
