

Clean-cut, Smart *and* Soldierly

Under the most trying circumstances — always at his best

In Camp, on Transport, or in the Trenches, he needs a dependable razor—one which sharpens its own blades and keeps them in perfect condition. He will find a world of Comfort in using a Safety Razor which never gets dull. A man feels clean all over when his face is clean, and soldiers on active service cannot afford to be without the AutoStrop Razor, the only Safety Razor which does not depend on a supply of new blades.

Would you send him to the Front with a rifle which plays out after firing a few shots, or with a pipe which would be no good after filling it a few times? Then what about his razor? Will he be forced to grow a beard because it hurts him to shave, or will you give him an AutoStrop Razor, and thus equip him for the entire campaign, because it is the only razor in the world which sharpens its own blades?

AutoStrop SAFETY RAZOR

TO FRIENDS—If you are buying a razor for presentation purposes, remember that an AutoStrop Razor will be most appreciated. The AutoStrop Razor is more than a razor, more than a safety device. It strops, it shaves and is cleaned without taking anything to pieces, without even removing the blade. And like a perfectly stropped ordinary razor, the blade improves with use.

GIVE HIM AN AUTOSTROP RAZOR

The only razor which keeps its blades sharp and is always ready for the shave, because it strops itself.

Sold By All High Class Dealers
