**BOHN SYPHON REFRIGERATOR**  
The lining of porcelain fused into steel in single piece in all but the very latest models is far different from the ordinary enamel paint which is so often called "porcelain." The Bohn porcelain will not crack or chip. The corners are round—no place for food particles or dirt to lodge. The drain is in front where it can be cleaned easily and frequently without removing the contents of the refrigerator.  
The Syphon System of rapid air circulation from ice to food compartment and the 10-layer, heat-resisting walls (including "Flaxinum," the exclusive Bohn insulation) hold the temperature very low.  
Because of the Syphon System, no moisture condenses on the food. Condensing moisture contaminates foods, causing butter or cream to smell and taste like bananas, onions, cheese, etc. Foods come fresh and fragrant from a Bohn Syphon. You can strike a match anywhere on the lining. It is so dry.  
The original cost comes back to you in reduced ice bills. Superior insulation and the Syphon System both contribute to ice economy. The Bohn Syphon is known everywhere as a great ice saver. Think what this will mean this Summer, with cost of ice probably the highest ever known.  
Bohn Syphon and other Bohn Refrigerators are shown here in great variety, at prices from \$19 up. If you cannot call, write for a catalog.
