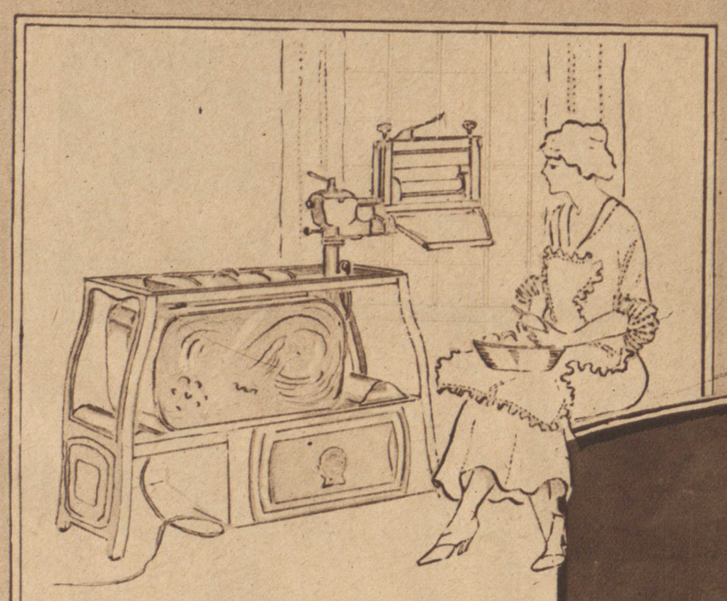
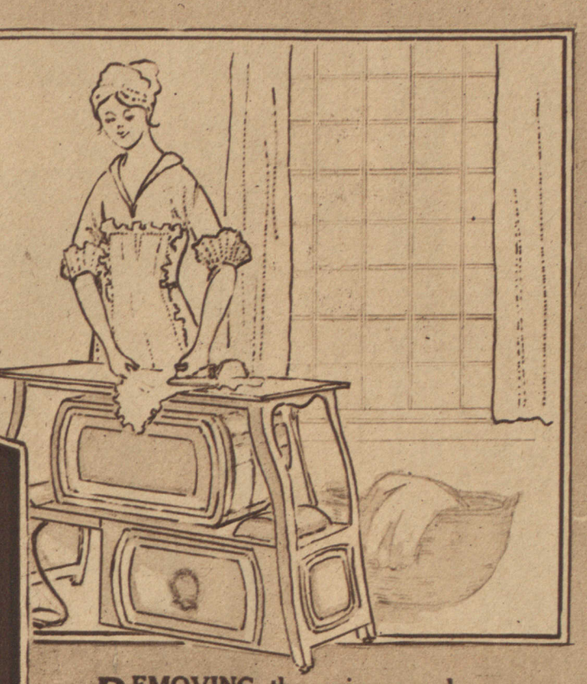
LOCOMOTIVE

ELECTRIC WASHER



The Assistant Director of The Tribune Institute about to fight the gas flame that boils the water while it washes.

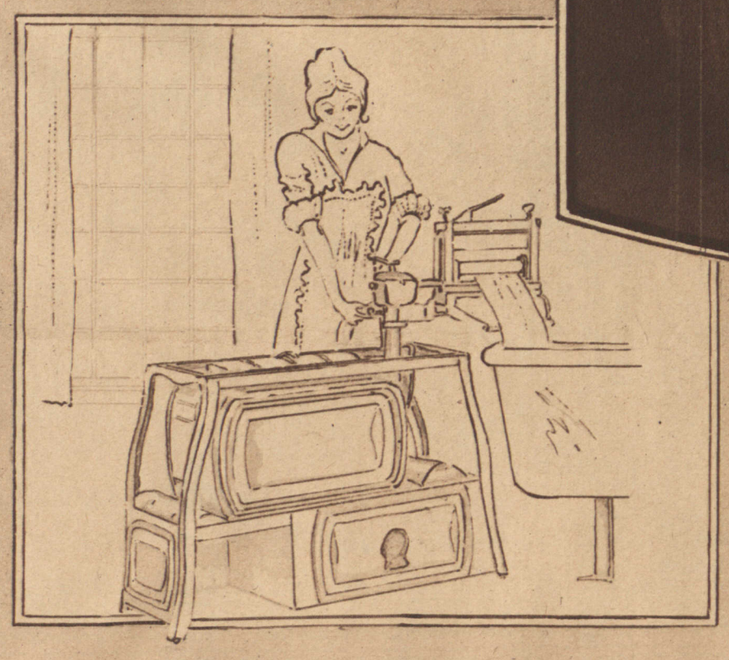


MANY little kitchen tasks may be accomplished, while the Locomotive washes and sterilizes your clothes.

THE MOTOR operates the washer and the wringer at the same time.

REMOVING the wringer and replacing the wooden top converts the Locomotive into an efficient ironing board.

WHEN not otherwise in use, the Locomotive may serve as a kitchen table, and thus adapts itself to apartments.



"From Durtyville to Spotless Town"

(Tribune Institute Article, Nov. 9th)

What the Tribune Institute found out about the Locomotive Washer.

THE TEST

"The washing used for the test included sheer lingerie, table linen with coffee stains, and badly stained dish towels; one white skirt that was very dusty and grimed from wear. All were as clean as possible at the end of eight minutes!"

"Hot Water Plus Velocity Equals Efficiency"

The above results were obtained with the water at a temperature of 150 degrees. Had the water been brought to a boiling point, even less time would have been required.

Buy your electrical supplies and appliances through your Contractor-Dealer.

WHY WAIT!!

WHY wait a year before you buy an Electric Washer? It is just as necessary in most homes as modern plumbing.

Don't let your neighbor's wife be the one to look free from worry.

House servants won't do it—laundresses are exorbitant—sending it out ruins your washing.

Tomorrow is wash day and Christmas is coming. Why not keep them both in mind when leaving for your office in the morning?

OUTSTANDING FEATURES

Compact for apartments.
Most forceful water action.
Heating attachment boils while washing.
Mechanical simplicity.
Quick detachable swinging wringer.
Ironing board on top of machine.
Equipped with one-quarter horsepower motor.
Eight sheet capacity or twenty-five shirts.
No bolts, rivets or screws in boiler.
No wear or tear on clothes.
Wrings and washes at the same time.
