# Always Ready for Callers

## EASY VACUUM ELECTRIC WASHER

Manufactured by Syracuse Washer Corporation,  
Syracuse, N. Y.

When the door bell rings she can leave her EASY Vacuum Electric Washer with the assurance that she will find a tubful of clean clothes when she returns.

She knows, because it washes in the scientific way—two vacuum cups moving up and down force the steaming suds through and through the mesh of the clothes.

The EASY Washer means double the wear for your clothes—and your washing is done in a fourth the usual time.

She's never embarrassed by early morning calls—time of day has nothing to do with the tidy readiness of her home—or herself.

Wash day—Cleaning day—you'll have to call mighty early to find her ruffled.

She is one of the great army of modern, efficient housekeepers, always ahead of her work. She has learned the value of *electrical helpers*.

These Electrical Helpers are built to last—tough, solid copper, brass and aluminum, iron and steel make them an investment that will save money and labor for many years. Your household will reach its top notch of efficient operation when you have these two tireless, dependable servants.

## AMERICA ELECTRIC VACUUM CLEANER

Manufactured by Wise-McClung Mfg. Co.,  
New Philadelphia, Ohio.

Orderly cleaning and AMERICA cleaning are one—that's why this new day housekeeper is never found with her home upside down.

Her furnishings are cleaned right in their places. And they are thoroughly *clean*—in the comfortable, easy way, without dust or bother.

The extra powerful suction and the spiral brush of the AMERICA get all the lint and litter that usually cause trouble. You can adjust the restful shock-proof handle to any desired height, and there's a full set of attachments.

**LIVINGSTON SALES CORPORATION** maintains for your convenience a well-equipped display room where modern electrical labor-saving appliances may be examined and demonstrated. Your order will be referred to the Livingston dealer in your community who will give it his prompt and careful attention.
