Relating to the above Symphony

My dear Sir

I take the liberty of sending you here with my Symphony with the accompaniments of Violin & Violoncello (ad lib.) In looking over the arrangment for two performers I saw that I very often have used abbreviations or signs, when there was a passage repeated several times, as for instance instead of or of and particulady instead of , for , unisons, or coll'8va &c. &c. — I wish not to have printed those abbreviations, at least not as often, as I made use of them in my manuscript,

& you would extremely oblige me in directing the printer to do so:

You have most kindly promised me to send me the copperplates before the publication to Berlin, in order to enable my publisher in that town to print the simphony after them as I do not possess another manuscript but the one I send you, & as it would be very agreeable to me to look over the arrangement once more & with greater ease before its being published in England. I accordingly requested my friend Mr. Klingemann to send me over to Berlin these plates, as soon as you will have them finished & he is to call upon you for that purpose in the beginning of January, which I think is the latest period when they must be had in Berlin, if they shall be published the 1st of February, as we agreed upon.

Accept once more my thanks for all the kindness which on every occasion you have been pleased to shew me, & believe me

my dear Sir

yours very truly
